### Oare Creek Entrance Low Tide

[Click on picture to enlarge!](#)

Thanks to members Ruth and Peter Guy (Dazcat "Zaba") for this aerial photo of the entrance to Oare Creek at low tide, showing exactly why our depth sounders get so agitated.

“An interesting channel line to follow, especially for those of us with two hulls. Maybe we need some laden barges to come in and out very frequently,” they suggest.

The photo was taken by Peter while in a friend's plane.
